lamination.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-9, drawn to a composition, classified in class 528, subclass 10+.

II. Claims 10-12, drawn to a prosthesis, classified in class 623, subclass various.

III. Claims 13-16, drawn to a method of coating, classified in class 427, subclass 2.24.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group III and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by a materially different process, such as by

Inventions of Group I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the composition or product as claimed can by used in a materially different process, such as being extruded into a free-standing sheet.

Application/Control Number: 10/677,389 Page 3

Art Unit: 1762

4. Because these inventions are distinct for the reasons given above and have acquired a

separate status in the art as shown by their different classification, restriction for examination

purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required

for Group I is not required for Group II or III, restriction for examination purposes as indicated is

proper.

6. This application contains claims directed to the following patentably distinct species of

the claimed invention:

A) within Group I (claims 1-9), there are the following species:

- a) polyether-urethane;
- b) polyester-urethane.

B) within Group II (claims 10-12), there are the following species:

- c) vascular duct;
- d) cardio-vascular patch;
- e) valve prosthesis;
- f) sheet for a valve prosthesis.

Page 4

- g) a metal stent;
- h) a polyester vascular prosthesis;
- i) polypropylene abdominal net.

IF APPLICANT ELECTS GROUP 1, THEY ARE REQUESTED TO MAKE THE ELECTION OF SPECIES OF A).

IF APPLICANT ELECTS GROUP II, THEY ARE REQUESTED TO MAKE THE ELECTION OF SPECIES OF B).

IF APPLICANT ELECTS GROUP III, THEY ARE REQUESTED TO MAKE THE ELECTION OF SPECIES OF C).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Application/Control Number: 10/677,389

Art Unit: 1762

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Page 5

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. A telephone call was made to John Murtaugh on August 23, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Application/Control Number: 10/677,389

Art Unit: 1762

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erma Cameron whose telephone number is 571-272-1416. The

examiner can normally be reached on 8:30-6:00, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Timothy Meeks can be reached on 571-272-1423. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
